Dear Elio,

Having analysed 'Ceracoat Ceramic' using our own technical centre and expertise we are delighted to add the product to our Nitrox performance additive range.

We are to call the product 'Ceramic 7 Engine Coating', and it will be available to the UK market from 1st March 2004. 'Ceramic 7' is recommended for use in cars, motorcycles, high-performance engines and marine engines. We have already advertised the product in our 'Trade News' magazine and have received a positive response from our customers. A full colour information brochure has been produced and will be distributed upon launch to our entire customer base.

Tetrosyl are confident that 'Ceramic 7 Engine Coating' will prove to be an excellent addition to our Nitrox range. May I take this opportunity to thank you for your assistance with the project,

Best regards

Leon James
Product Manager
Tetrosyl Limited, England.
